Technical Data Sheet

InVivoMAb anti-mouse IFNγR (CD119)

Attention: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at https://bioxcell.com/terms-and-conditions.

Lot Specific Information

Lot Number: **Lot Specific***
Volume: **Lot Specific***
Concentration: **Lot Specific* (generally 4 to 11 mg/ml) ***
Total Protein: **Lot Specific***

*This information will be noted on the certificate of analysis that ships with this product.

Product Information

Catalog Number:	**BE0029**
Clone:	**GR-20**
Isotype:	Rat IgG2a, κ
Recommended Isotype Control(s):	InVivoMAb rat IgG2a isotype control, anti-trinitrophenol
Recommended Dilution Buffer:	InVivoPure pH 7.0 Dilution Buffer
Immunogen:	BALB/c mouse monomyelocytic cell line WEHI-3
Reported Applications:	*in vivo* IFNγR neutralization *in vitro* IFNγR neutralization
Formulation:	PBS, pH 7.0 Contains no stabilizers or preservatives
Endotoxin:	≤1EU/mg (≤0.001EU/μg) Determined by LAL gel clotting assay
Purity:	≥95% Determined by SDS-PAGE
Sterility:	0.2 μm filtered
Production:	Purified from cell culture supernatant in an animal-free facility
Purification:	Protein G
RRID:	AB_1107576
Molecular Weight:	150 kDa

Description

The GR-20 monoclonal antibody reacts with the mouse IFNγR (interferon gamma receptor) α chain also known as CD119 and IFNγ receptor 1. CD119 heterodimerizes with IFNγ receptor 2 (AF-1) to form the IFNγR, a Class II cytokine receptor. The IFNγR is expressed ubiquitously on almost all cell types with the exception of mature erythrocytes. The GR-20 antibody binds to an epitope in the ligand-binding site of the receptor and has been shown to block the binding of IFNγ to CD119 therefore inhibiting IFNγ mediated effects.

Storage

Store at the stock concentration at 4°C . **Do not freeze.**
It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at https://bioxcell.com/faqs.

Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
