# Technical Data Sheet

## InVivoMAb anti-mouse TIM-2

**Attention: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at https://bioxcell.com/terms-and-conditions.**

## Lot Specific Information

**Lot Number:** **Lot Specific***
**Volume:** **Lot Specific***
**Concentration:** **Lot Specific* (generally 4 to 11 mg/ml) ***
**Total Protein:** **Lot Specific***

*This information will be noted on the certificate of analysis that ships with this product.

## Product Information

| | |
|---|---|
| **Catalog Number:** | **BE0114** |
| **Clone:** | **RMT2-29** |
| **Isotype:** | Rat Ig2a, λ |
| **Recommended Isotype Control(s):** | InVivoMAb rat IgG2a isotype control, anti-trinitrophenol |
| **Recommended Dilution Buffer:** | InVivoPure pH 7.0 Dilution Buffer |
| **Immunogen:** | Not available or unknown |
| **Formulation:** | PBS, pH 7.0<br>Contains no stabilizers or preservatives |
| **Endotoxin:** | ≤1EU/mg (≤0.001EU/μg)<br>Determined by LAL gel clotting assay |
| **Purity:** | ≥95%<br>Determined by SDS-PAGE |
| **Sterility:** | 0.2 μm filtered |
| **Production:** | Purified from cell culture supernatant in an animal-free facility |
| **Purification:** | Protein G |
| **RRID:** | AB_10949464 |

## Description

The RMT2-29 monoclonal antibody reacts with mouse T cell immunoglobulin and mucin domain 2 (TIM-2), a type I cell-surface glycoprotein and member of the Ig superfamily. TIM-2 is preferentially expressed on TH2 cells as well as activated T cells. The TIM gene family, plays critical roles in regulating the immune response to viral infection. TIM-2 is also involved in the development of atopic disease and other TH2-biased immune responses.

## Storage

Store at the stock concentration at 4°C . **Do not freeze.**
It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at https://bioxcell.com/faqs.

## Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
