Technical Data Sheet

InVivoMAb anti-mouse MHC Class I (H-2Kb) bound to SIINFEKL peptide (OVA residues 257-264)

Attention: Use of this product constitutes an agreement to Bio X Cell's Terms and Conditions which are included with this product in print and can also be found at https://bioxcell.com/terms-and-conditions.

Lot Specific Information

Lot Number: **Lot Specific***
Volume: **Lot Specific***
Concentration: **Lot Specific* (generally 4 to 11 mg/ml) ***
Total Protein: **Lot Specific***

*This information will be noted on the certificate of analysis that ships with this product.

Product Information

Catalog Number:	**BE0207**
Clone:	**25-D1.16**
Isotype:	Mouse IgG1, κ
Recommended Isotype Control(s):	InVivoMAb mouse IgG1 isotype control, unknown specificity
Recommended Dilution Buffer:	InVivoPure pH 7.0 Dilution Buffer
Immunogen:	SIINFEKL pulsed RMA-S cells
Reported Applications:	*in vivo* blocking of Kb -SIINFEKL Functional assays Flow cytometry
Formulation:	PBS, pH 7.0 Contains no stabilizers or preservatives
Endotoxin:	≤1EU/mg (≤0.001EU/μg) Determined by LAL gel clotting assay
Purity:	≥95% Determined by SDS-PAGE
Sterility:	0.2 μm filtered
Production:	Purified from cell culture supernatant in an animal-free facility
Purification:	Protein G
RRID:	AB_10950697
Molecular Weight:	150 kDa

Description

The 25-D1.16 monoclonal antibody reacts with mouse MHC class I H-2Kb bound to the ovalbumin-derived peptide with sequence SIINFEKL. This antibody does not react with unbound MHC class I H-2Kb or MHC class I H-2Kb bound to an irrelevant peptide. The 25-D1.16 antibody is often used to track the quantity and localization of antigen-presenting cells bearing these specific molecules in vivo.

Storage

Store at the stock concentration at 4°C . **Do not freeze.**
It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at https://bioxcell.com/faqs.

Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration

experiment.
