## Description

CPB503 is a 1+1 asymmetric bivalent bispecific antibody isotype control. CPB503 reacts with proteins not expressed by mammals and is ideal for use as an isotype-matched control for most in vivo and in vitro applications.

## Storage

Store at the stock concentration at 4°C . **Do not freeze.**
It is not uncommon for a floccule or precipitate to appear during storage. The floccule is typically buffer salts precipitating out of solution or a small bit of protein aggregation. For information on how to remove floccules or precipitates see our FAQ's at https://bioxcell.com/faqs.

## Protocol Information

Since applications vary, each investigator should use the application references as a guide to help estimate the appropriate

dose or concentration. The dose or concentration can be further optimized experimentally in a dose response or titration experiment.
